MESOACTIVE COSMESIS

THE FIRST PROFESSIONAL COSMECEUTICAL LINE DIRECTLY ORIGINATED
FROM AESTHETIC MEDICINE, WHICH COMBINES MEDICAL EFFICIENCY WITH
THE SIMPLICITY OF A COSMETIC.

 mesofill

 AESTHELAB™

TREATMENT PROTOCOL

A proper assessment is essential to define the protocol best suited to the specific condition and individual subject.

Mesofilling treatments are dose-dependent. Hence, the dosage needed may vary from client to client according to the size and the severity of the condition.

Aesthelab Srl is an industry-leading provider in the cosmetic and medical aesthetic market. At the forefront of the non-invasive procedure, Aesthelab has been committed from day one back in 2001, with providing mesoporation technology, high performance cosmeceuticals, truthful marketing, and extensive ingredient information.

Our long lasting expertise in the field of Mesoporation has given birth to Mesofill a unique range of rich cosmeceuticals to be used in conjunction with mesoporation, mesofilling, electroporation, radiofrequency and ultrasound technologies.

It combined three important features:

| | |
|--------------------------------------|---------------------------------------|
| BOTOFILL VISAGE TONE | LUMINANCE VISAGE TONE |
| EXAGE VISAGE TONE | VOLUMINE TONE |
| Q10-COMPACT VISAGE TONE | STRIACARE TONE |
| LIPOLUTION SLIM CELL | LISOCCELL SLIM CELL |
| EYELIS VISAGE TONE | SKIN PERFECT VISAGE TONE |

Unique formulas originating from the medical experience of a team of international skin experts. Efficiency of products thanks to the use of high concentration of active substance. Selected raw materials.

Professional Treatment
SUGGESTED PRODUCTS TO BE USED WITH

This anti-aging formula offers natural, progressive results, which are noticeable from the first session in terms of skin tone and hydration. Visage enables revitalization and deep hydration of the skin. It also effectively tackles a lack of brightness and a loss of skin tone and enhances elasticity or firmness.

COSMETIC COMPOSITION

Vitamin A

Vitamin A or Retinol works as an antioxidant for the skin, disarming free radicals that cause tissue and cell damage. Vitamin A increases the skin's cell turnover, while also boosting collagen, resulting in a more youthful overall appearance.

Vitaminic Complex

Vit. C is a very effective antioxidant that neutralizes free radicals.

Hydrolyzed protein

This active ingredient shows a relevant effect in increasing moisture and elasticity of the skin.

Hyaluronic acid

Moisturizes the skin and maintain the elasticity of dermal and epidermal tissues.

Coenzyme Q10

Revitalizes the epidermis and dermis, reducing the damage induced by free radicals in the skin. The use of Q10 coenzyme leads to an increase in the resistance and elasticity of the skin, as well as a reduction in flaccidity.

Glucose, Sorbitol, Sodium Glutamate, Urea, Glycine, Lactic Acid

Moisturizing Mix.

IDEAL FOR TREATING:

Cronoageing, photoageing, skin laxity, discoloration, fine lines, deep furrows, bags and dark circles.

SUGGESTED BOOSTER SERUM TO BE USED WITH

| BOOSTER SERUM | FUNCTIONALITY |
|---------------|--------------------------------|
| EXAGE | ANTI-AGING |
| LUMINANCE | WHITENING |
| Q10 COMPACT | TIGHTENING |
| JALUPURE | MOISTURIZING/ BIO REVITALIZING |
| BOTOFILL | ANTI WRINKLES |

Designed to work on fat deposits and remodeling of the body contour, this formula contains a unique combination of active ingredients which help reduce stubborn fat by enhancing the metabolism of fat. It also contains ingredients that firm the skin and improves skin elasticity.

COSMETIC COMPOSITION

Bitter orange peel extract

It helps to prevent skin fragility and increases skin tone. It may have relevant cell differentiation promoting and helping to increase metabolism (thermogenesis).

Horse-Chestnut

This extract has a direct influence on improving the health of veins and capillaries in the skin, which in turn leads to proper circulation and maximum skin functioning. It has a strengthening effect on the venous system preventing capillary fragility.

Fucus

These extract have effective lipolytic properties by stimulating lipases. It may have depurative and tightening effects.

L- Carnitine

This ingredient is well known for enhancing the mobility of triglycerides and accelerating their breakdown.

Caffeine

Caffeine increases blood flow and stimulates the fat cell to release fat to the bloodstream to be burned by the body's metabolism. Basically, caffeine acts to drain the fat cells. Moreover, caffeine also tightens and tones the skin, and helps reduce the appearance of cellulite.

IDEAL FOR TREATING:

Localized fat deposit, orange peel skin.

A very rich formula containing a blend of effective active ingredients in therapeutic quantities. It facilitates drainage while reducing stubborn fat. It can provide smoothness and flexibility, increasing skin elasticity and reducing the appearance of cellulite.

COSMETIC COMPOSITION

Centella

It promotes vein and capillary health in the skin and is a good general application for the promotion of healthy skin. There by improving the appearance of the skin in general.

Ananas

It has great anti-inflammatory properties and promotes circulation. It helps to remove waste products and fatty build-ups from the tissue and to release fatty deposits from the cells.

Horse-Chestnut

It has a strengthening effect on the venous system preventing capillary fragility. It inhibits collagenase and elastase in the skin and therefore leads to healthier collagen and skin structure.

Fucus

These compounds have effective lipolytic properties by stimulating lipases. It may have depurative and tightening effects.

Hamamelis Distilled Water

It is used for its soothing, cleansing and toning effects on the skin, while at the same time improving circulation and fighting water retention and puffiness.

L-Carnitine

This ingredient is well known for enhancing the mobility of triglycerides and accelerating their breakdown. It is used to transport fatty acids and further promotes lipogenesis inhibition.

Caffeine

Caffeine increases blood flow and stimulates the fat cell to release fat to the bloodstream to be burned by the body's metabolism. Basically, caffeine acts to drain the fat cells. Moreover, caffeine also tightens and tones the skin, and helps reduce the appearance of cellulite.

IDEAL FOR TREATING:

Localized Fat deposit and Cellulite.

www.mesofill.com

A rich firming formula that hydrates and revitalizes skin, while toning and firming the skin to a new degree. Recommended for abdomen, hips, thighs, buttocks, and other problem areas. Tone produces a smoother more youthful look.

COSMETIC COMPOSITION

Sweet almond oil

Excellent emollient which helps to soften and soothe the skin while preventing moisture loss.

Hydrolyzed Elastin and Collagen

Elastin helps the skin maintain its natural elasticity by aiding in the binding of moisture. Collagen helps to aid cell regeneration by promoting firming and lifting benefits.

Vitamin A/Retinol

Vitamin A or Retinol works as an antioxidant for the skin, disarming free radicals that cause tissue and cell damage. Vitamin A increases the skin's cell turnover, while also boosting collagen.

Coenzyme Q-10

Revitalizes the epidermis and dermis, reducing the damage induced by free radicals in the skin. The use of Q10 coenzyme leads to an increase in the resistance and elasticity of the skin, as well as a reduction in flaccidity.

IDEAL FOR TREATING:

Facial and body skin laxity and hypotony, breast firming.

An exciting new aspect is that ozone, being a strong oxidizer, can stimulate the increase of cellular anti-oxidant enzymes, such as, Super Oxide Dismutase, eventually inhibiting the oxidative stress.

In simple terms, SOD acts as a super-scavenger of potentially damaging free-radicals. Free radicals are also known to be partly responsible for the aging process as well as a variety of illnesses and conditions.

COSMETIC COMPOSITION

| | |
|----------------------|--|
| Ozonized Jojoba Oil | Anti-oxidant, nourishing and protective properties. |
| Acetyl Hexapeptide-8 | Smoothes wrinkles relaxing face muscles. |
| Hyaluronic acid | Provides maximum hydration and softness to the skin. Forms a protective film on the skin that prevents dehydration. Moisturizes and fills the epidermis. |
| Vitamin E | Anti-oxidant properties. |

OX3 VISAGE

Thanks to hydrophobic properties, the activated oxygen promotes the drainage of excess fluid.

Another relevant aspect of Ozone is related to its unique capability of fighting cellulite. the action of ozone on cellulite develops through 3 different mechanisms:

- Breaking down of the lipid chain by altering their properties - hydrophobic lipids are changed in hydrophilic lipids which are easier to eliminate.
- Improving micro-circulation by increasing the erythrocytes elasticity .
- Enhancing drainage of liquid from tissues.

COSMETIC COMPOSITION

| | |
|----------------------|---|
| Ozonized Jojoba Oil | Anti-oxidant, nourishing and protective properties. |
| Tea-Hydroiodide | Effective lipolytic effect by stimulating lipases. |
| Escin | Escin has astringent, vasoconstrictor, anti-inflammatory, as well as circulation boosting properties and has a "sealing" effect on capillaries. |
| Vegetal stem cells | Anti-oxidant, nourishing and great anti-inflammatory properties. |
| Marine algae extract | It has ideal emollient and hydrating properties to help moisturize and nourish the skin. |
| Glaucine | Effective lipolytic effect by stimulating lipases. |

During the application of a substance on the skin surface only small amounts of it can pass through the skin. For this reason, the skin is a physiological barrier that prevents the spread of foreign substances in the body.

Each phase of the Mesofilling™ protocol is carefully designed to optimize the transition of active ingredients through the skin. Cleansing (step 1) and normalization of PH (step 2) are needed to prepare the skin for treatment, making it more receptive to the passage of functional substances.

GLICOLIX 10%

Silky gel formula spreads easily and feels nearly weightless on skin. Glicolix gently exfoliates surface of the skin with 8% glycolic acid and an effective pH range of 3.5-3.8. Helps fade signs of sun damage, correct uneven skin tone (dullness, ashiness, skin discolorations), and makes skin feel wonderfully smooth.

Glicolix is also suggested to be used before applying specific skincare products.

DERMALCLEAN

Formulated with rich natural fruit oils and ceramides, in a light gel base to cleanse the skin, remove make-up and impurities without using drying soaps. Moisturizes while it cleanses to keep skin soft with no greasy feeling.

Use daily as a routine Dermalclean for dry and normal skin. Hypo-allergenic. Dermalclean is also suggested to be used before applying specific skincare products.

ADVANCEDSKINCARE

Hyper mimic wrinkles, most pronounced in the forehead, brow, and paraorbital region, are very common cosmetic defects. Increased activity of facial muscles is one of the precipitating factors in the development of facial wrinkles, which accelerate the involution process. A very potent anti-wrinkle serum which has been proven to reduce wrinkling through the contraction of muscle cells. It is similar to Botox, but it is a topical serum rather than an injection, making it attractive to people reluctant to try facial injections. It is a marvelous blend of Argireline, Matrixil, Syn-Ake and Hyaluronic Acid.

COSMETIC COMPOSITION

Argireline

Causes relaxation of facial muscle contractions, resulting in a smooth and younger skin.

Synake

It has excellent skin-smoothing properties and reduces the depth of facial wrinkles in just a few days.

Matrixyl

Stimulates the fibroblasts to synthesize molecules of connective tissues, especially elastin. Provides firmness and elasticity to the skin.

Hyaluronic acid microspheres

They are hyaluronic microspheres that fill in deep wrinkles. Dehydrated for better penetration, they swell up with water in the skin and fill wrinkles very quickly because of the volume increase. They also provide long-lasting hydration thanks to a micro-reservoir effect.

IDEAL FOR TREATING:

Mimic wrinkles, Fine lines.

BOTOFILL

Unlike BOTOX, Botofill gel does not lead to a loss of facial expression. Boosts collagen levels to increase skin elasticity and gives skin a tighter, firmer look.

SKIN AGING

As we age and our skin is exposed to environmental pollutants and the sun's ultraviolet rays, our cells gradually lose the ability to produce hyaluronic acid. Skin begins to thin and become more fragile. Wrinkles develop as our collagen, elastin and hyaluronic acid break down, causing the skin to lose elasticity and volume.

JALUPURE HELPS FIGHT WRINKLES AND SKIN AGING

Jalupure is a modern formulation of low and high molecular weight Hyaluronic acid. Hyaluronic acid's ability to retain water gives immediate smoothness to rough skin surfaces and significantly improves tone, texture, colour and the overall appearance of the skin tissue.

Apart from moisturizing, it also binds the moisture in the skin and controls tissue hydration - thereby imparting a more youthful looking skin. It helps to smooth out wrinkles and lines and at the same time boost the health of the cells and has a structure stabilizing function as well.

It helps to keep the skin elastic and supports the collagen - the foundation of the skin - and fights inflammatory conditions of the skin, which contributes to aging. The increased skin permeability induced by mesoporation allows its penetration into the deepest part of the skin.

For face, décolleté, breast and body areas.

JALUPURE

JALUPURE

It is pure hyaluronic acid 100%. The practical syringe doser allows an accurate portion control and precise application directly on the treatment area.

BOOSTER SERUM

A Powerful anti-pigmentation serum that stops the formation of age spots by blocking the activity of the tyrosinase enzyme without damaging cells, while minimizing the existing brown spots. When used with Mesofill Visage, the treatment results are remarkable. Firming, moisturizing and antioxidant power is increased to leave the skin soft and smooth.

COSMETIC COMPOSITION

Extract of Licorice and Phytic acid

Due to its anti-oxidant properties it helps avoid pigmentation caused by UV radiation. Phytic inhibits tyrosinase, and is a non-irritant agent.

Kojic acid

It is very effective as a skin lightening agent, inhibiting production of melanin brown pigment.

Alpha-arbutine

Inhibits melanin production.

Vitamina C

Anti-oxidant inhibits tyrosinase.

Eureco HC (PAP)

Pigmentation reducer that can inhibit tyrosinase and melanin formation in melanocytes.

IDEAL FOR TREATING:

Age spots and skin discolorations such as darkened patches from acne, freckles and resolved skin trauma.

BOOSTERSERUM

Exage is an intensive anti-aging serum with a rich concentration of Matrixyl, which plays a role in the synthesis of collagen, fibronectin and hyaluronic acid (The principal components responsible for the skin's support structure). Wrinkles and fine lines are significantly reduced. Organic silicium reinforces this action by acting on the synthesis of elastin to allow the skin to better preserve the quality of its natural elasticity. The skin seems "plumped up" from within. The immediate wrinkle-filling effect is produced by a high concentration of micronized and dehydrated hyaluronic acid, an innovative formulation which fills wrinkles and lines from the inside while leaving the skin wonderfully soft.

COSMETIC COMPOSITION

Hyaluronic acid

Pure, non-crosslinked Hyaluronic Acid is a highly-effective skin moisturizing agent. Its particular ability to attract and bind water molecules serves to moisturize the skin and maintain the elasticity of dermal and epidermal tissues.

Organic silicium

Organic Silicium hydrates, renews and regenerates cells. It stimulates and regulates fibroblast proliferation, enhances collagen synthesis and promotes the regeneration of elastic fibres. Organic Silicium smoothes, tones and lifts the skin, slowing down the ageing process.

NMF (DI-Glutamic acid 2%, PCA 1%, Allantoin 2%)

This active ingredient immediately increases the moisture and hydration of the skin.

Hydrolyzed collagen

Apart from nourishing the skin, Hydrolyzed collagen helps to improve moisture retention and to increase skin smoothness, elasticity and suppleness.

Palmitoyl pentapeptide-4 (Matrixyl)

Stimulates the synthesis of collagen types I and III. Stimulates the synthesis of collagen type IV in mature fibroblasts. Stimulates the synthesis of glycosaminoglycans in the fibroblasts. Increases the density and thickness of elastin fibers.

IDEAL FOR TREATING:

Aging Skin, Mature Skin.

EXAGE

BOOSTERSERUM

Volumine is a new formulation designed to enhance the bust and curves of the body. It helps to promote body volume with a lipofilling-like effect. Clinically tested, Volumine is also recommended to help plump the buttocks, hands, cheeks and any other part of the body or face that needs volume filling. The mechanism of action is not hormonal based and does not interfere with the endocrine system. The unique blend of ingredients and micronized hyaluronic acid has the ability to define and reshape the curves of the body while helping to prevent the formation of stretch marks and skin laxity by increasing the skin's elasticity.

COSMETIC COMPOSITION

Anemarrhena asphodeloides root extract (Volufilline)

Helps promote body volume by stimulating the formation of adipose tissue giving a cosmetic lipofilling-like effect.

Peppermint

This essential oil helps to relieve itchy, dry skin as well as other skin irritations. It can also soothe and cool poison ivy, poison oak and hives.

Hyaluronic acid

Pure, non-crosslinked Hyaluronic Acid is a highly-effective skin moisturizing agent. Its particular ability to attract and bind water molecules serves to moisturize the skin and maintain the elasticity of dermal and epidermal tissues.

IDEAL FOR TREATING:

Bust, buttocks, hands, cheeks and any other part of the body or face that needs volume filling .

BOOSTERSERUM

This highly concentrated serum combines firming ingredients with agents that improve biological skin elasticity resulting in firmer skin. Q-10 COMPACT is also highly effective in reducing flaccidity and the formation of wrinkles. This serum improves the production of collagen and elastin fibers, reduces the signs of premature aging, tones and smooths the skin giving it elasticity and flexibility typical of young skin.

COSMETIC COMPOSITION

Bodyfit ®

Contributes to maintaining the integrity of the dermal connective tissue, increases the elasticity, and makes tissue more firm and compact.

Q10 Coenzyme

Revitalizes the epidermis and dermis, reducing the damage induced by free radicals in the skin. The use of Q10 coenzyme leads to an increase in the resistance and elasticity of the skin, as well as a reduction in flaccidity.

Elastin, Soja protein, Hop extract

This mix helps to improve elasticity and suppleness of the skin.

IDEAL FOR TREATING:

Face and body skin loosening.

BOOSTERSERUM

This formulation is packed with stretch mark fighting ingredients. It helps prevent, fight, and repair stretch marks caused by factors including pregnancy, breast feeding, diets, growth periods (puberty), sports, etc. Striacare has a unique formula that can reduce the depth, length, and roughness of distension stretch marks. This concentrated booster works as follows:

- 1) Preventive phase prior to a possible pregnancy: Increases the elasticity of the skin, minimizing the occurrence of stretch marks.
- 2) Vascularized phase: Activates tissue regeneration while oxygenating and moisturizing the skin.
- 3) Regenerative phase: Stretch marks have already formed. The product stimulates the regeneration process. Its mix of ingredients used in conjunction with MESOFILL TONE acts synergistically to maximize the treatment results.

COSMETIC COMPOSITION

Boswellic acid, Lactic acid, Glycolic acid

Chemical peel and exfoliating action.

Panax Ginseng , Paullinia cupana

It creates reactivating properties in the skin by stimulating the synthesis of collagen, elastin and fibronectin.

Masterwort (Imperatoria)

Contributes to maintain the integrity of the dermal connective tissue.

Tea Tree oil (Melaleuca Alternifolia)

Softens the skin and reaffirms the tissues.

IDEAL FOR TREATING:

Fresh stretch marks from pink to red and white settled stretch marks.

BOOSTERSERUM

Innovative formulation designed to improve lipolytic action. Lipolition, in combination with mesofill slim and mesofill cell, is used for the treatment of cellulite mixed with fat, especially in areas of the chin, hips, abdomen and trochanters.

Suggested for use in the adjuvant treatment of fatty eyelid bags. This mix of ingredients used in conjunction with mesofill slim and mesofill cell acts synergistically to maximize the treatment results.

COSMETIC COMPOSITION

L-Carnitine

L-Carnitine is responsible for metabolizing fat. After breaking down the stored fat, it mobilizes the fatty acids into the bloodstream, attaching itself to them and carrying them to the area of the cell that converts fat to energy. L-Carnitine is essential for optimal fat burning.

Phosphatidylcholine

Naturally abundant in cell membranes, this phospholipid, breaks down the fat stored in fat cells. It is characterized by a strong emulsifier action capable of converting adipocytes solid solutions to oil-aqueous fluid that is easier to metabolize.

It has a mobilizing action that increases the permeability of the membrane of the fat cells, thus favoring the output of the fat component. It stimulates the degradation, mobilization and elimination of fats. This makes it the ideal solution for eliminating unattractive, localized adiposities.

Sodium deoxycholate

It acts synergistically with phosphatidylcholine to improve its emulsifying action.

IDEAL FOR TREATING:

Localized deposit of cellulite mixed with fat.

BOOSTERSERUM

Lysocell creates a strengthening effect on the tissue by improving circulation and reducing water retention, giving the connective tissue a boost.

Its powerful ingredients absorb into skin easily to decrease fat pockets and enhance collagen production, producing a firmer, tighter, and younger looking skin. Lysocell provides smoothness and flexibility, increases skin elasticity and reduces the appearance of cellulite.

COSMETIC COMPOSITION

Aminophylline

Aminophylline is believed to increase cAMP concentrations by blocking an enzyme phosphodiesterase, which usually degrades cAMP. This action leads to an increased regional lipolysis.

Isoprotenerol

Isoprotenerol contributes to lipolytic action by reducing the accumulation of fat at the adipocytes.

Hyaluronidase

Hyaluronidase is a natural enzyme which increases tissue permeability and promotes the spread or dispersion of other drugs. It helps to break down the connective tissue bands that create the dimpled appearance of cellulite.

Melilotus Officinalis

This natural agent acts on the microcirculation of the skin. One of the components of this botanical extract is coumarin, which reduces lymphatic edema and diminishes capillary permeability.

IDEAL FOR TREATING:

The appearance of edematous and fibrous cellulite.

BOOSTERSERUM

An effective eye serum which stimulates circulation and strengthens the skin. It is especially useful in treating dark circles. Eyelis, a proprietary combination of selected active ingredients to boost the circulatory system and reduce fluid retention under the eyes.

COSMETIC COMPOSITION

Centella

Reduces the skin redness, strengthens of the capillary structure, restrains the vasodilatation and neo-vascularisation phenomena. Fights against rosacea.

Melilotus

It has some specific anti-edemigenic properties linked to its direct action on the smooth muscle contractility of lymphatic vessels.

Bilberry

It has excellent antioxidant properties and also contains Vitamin C. This helps fight free radicals, while preventing and reversing the damage to cells. It is also purifying and cleansing for all skin types, promotes circulation and soothes dry skin.

Hamamelis

Seals cells membranes and reduces capillary permeability.

Escin

Escin shows outstanding swelling modulating and vaso-active properties. It acts principally in capillaries, being its mechanism of action related to the modification of vascular permeability.

Olio di Argan

Skin moisturizer to hydrate and soften skin. With its high vitamin E and fatty acid content, argan oil is the ideal product to give skin a natural boost.

Licopene

It is a natural antioxidants, with protective effects on fibroblasts cell lines exposed to UVA radiations.
